

## How to fit vertical blinds

**1**

During the ordering process, you will have selected either 'inside recess' or 'outside recess' measurement's.

**outside recess** - follow face fix instructions

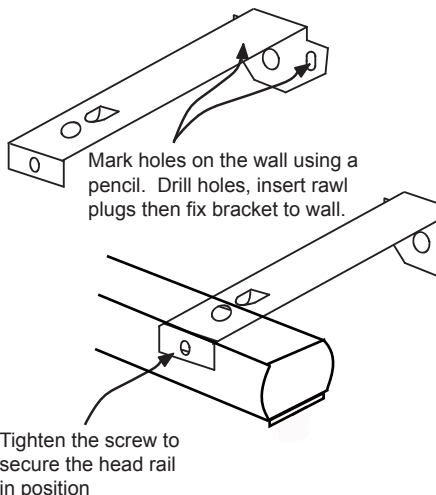

**inside recess** - follow top fix instructions

**2**

### Face Fix

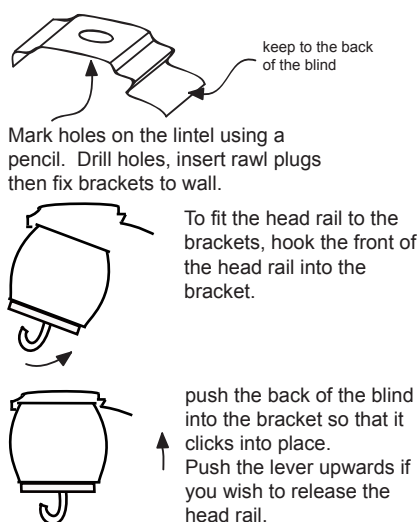

Each blind will be supplied with at least two brackets. Fit these brackets to the wall face approximately 5cm in from the ends of the blind. The head rail just screws in place.

**3**

### Top Fix

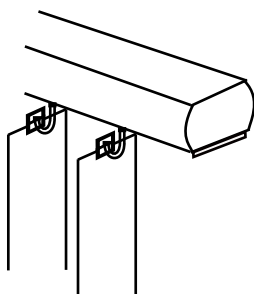

Each blind will be supplied with at least two brackets. Fit these brackets to the lintel approximately 5cm in from the ends of the blind. The head rail just clips in place.

**4**

Once the head rail is fitted, the fabric vanes can be fitted. Make sure the pegs are in the open position as shown below.

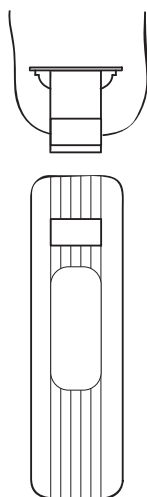

The slats will not rotate if they are fitted in the closed position ( i.e. flat )

**5**

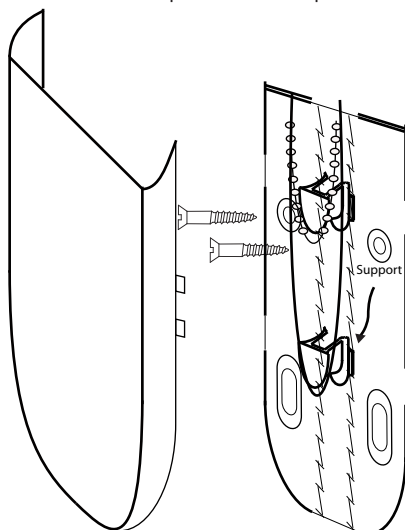

In the package you are sent a cord weight aswell as a child safety lock.

Follow the instructions depending which you choose. The instructions below are for a standard cord weight.

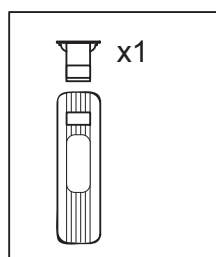

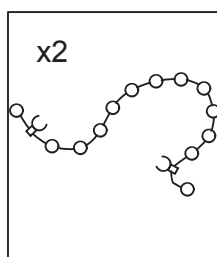

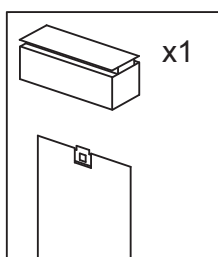

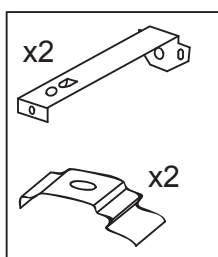

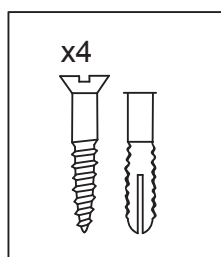

**6**

The instructions below is for child cord safety lock. This attaches onto the wall and locks the cords in place making them safe for children to use. Click the cover into place when complete.
