shop4blinds

- 1) Take a slat / louvre down from the current blind you have and lay it on a table or on the floor, making sure the slat is flat.
- 2) Measure from the top of the slat to the bottom as illustrated below and enter this size when ordering. This is called Fabric Size.
- 3) Your new slats will come as illustrated below with brand new sewn in top hangers, sewn bottom pockets & brand new weights & chains.

N.B. Grouping quantities of slats together which are the same drop but for different windows can often save money.
